

AquaNASE®

by Armstrong Medical

Key Features | AquaNASE®

Benefits of AquaNASE®

Patients can eat, drink, communicate and mobilise pulmonary secretions without disrupting therapy support.

Heated humidification helps prevent drying of upper airway mucosa increasing patient comfort during oxygen therapy.

Flows closer to a patient's inspiratory demand reduces ambient air entrainment and oxygen dilution.

High flow humidified PEP combines two respiratory therapies for the prevention and treatment of post-op pulmonary complications.
