CONTROL WITHOUT COMPLEXITY

Designed with clinicians and patients in mind, the core function of the AquaVENT® FD140i is to deliver safe and effective CPAP and High Flow Oxygen Therapy in a controlled and straightforward manner.

1 DEVICE, 2 THERAPIES

AquaVENT® FD140i helps you treat patients with Type 1 respiratory failure, safely and efficiently. When compared to a multi-therapy device or mechanical ventilator, AquaVENT® FD140i offers:

- A simple 5-step set up
- More comfort for your patient
- Easier patient mobilisation
- Quick and simple transition between therapies
- Timely delivery of respiratory support in line with your patient's needs.
