

## Neo**Flow**

## nCPAP Generator Fixation

1

Size the patient for prong or mask.

2

Fit the indicated colour coded nCPAP prong or mask to the nCPAP generator.

3

Fit nCPAP generator pressure and flow lines to AquaVENT® Neo Circuit using dedicated connector provided.

4

To fit support cradle, approximate distance from nares to brow.

5

Attach support cradle to nCPAP generator. Ensure pressure and gas supply lines are fitted in slot provided and exhaust line is secured above.

6

Apply nCPAP prong or mask and secure support cradle to bonnet.

7

Apply the grey securement lines to Velcro® tabs on the bonnet. Ensure prong or mask is securely fitted in nares but NOT overtight.
