THE RIGHT PRODUCTS AT THE RIGHT TIME

Sites

- 📍 Manufacturing
- 📍 Respond

We understand that your main priority is to ensure your clinical colleagues have the right products at the right time, to help save and support lives.

To do this you need reliable partners that you can depend on to supply quality products whenever and wherever you need them, reducing the need for you to hold excessive stock inventories.

Armstrong Medical ensures security of supply for vital respiratory equipment. Manufactured in the UK we offer:

- Reduced carbon footprint
- Short lead times (maximum 5-day delivery)
- Reduced risk of global supply chain issues

we are here

AquaVENT®

Medical equipment and breathing circuits designed to reduce the work of breathing for patients in acute wards and operating theatres.

NeoFlow®

Resuscitation and breathing circuits developed to provide the best support for the most vulnerable neonatal patients.

Adult Patient

Streamlining respiratory therapy delivery

Neonatal Patient

Improving comfort in neonatal care

Perioperative Patient

Improving patient safety

CHOICE AND VALUE

Purchasing open platform capital equipment and consumables allows you to:

- **Secure your product supply chain**
- **Rationalise your inventory**
- **Reduce waste**

OPEN PLATFORM SYSTEM

Customer empowerment, more control and choice

CLOSED PLATFORM SYSTEM

Supplier empowerment limiting customer choice

Aqua**VENT**® FD140i
Aqua**VENT**® heater humidifier
Aqua**VENT**® breathing circuits
Neo**Flow**® breathing circuits
Neo**Flow**® resuscitation circuits

All designed as open platform equipment and consumables working with other manufacturers' circuits and equipment.

REDUCING YOUR COSTS

As we manufacturing medical equipment and a wide range of breathing circuits you can purchase a comprehensive portfolio of respiratory products, from one supplier that can be used across your hospital from A&E to ICU and theatres.

This will reduce your costs by:

- Improving efficiency and economies of scale
- Reducing delivery charges
- Easing administration burdens

IMPROVING PATIENT OUTCOMES

Healthcare professionals want to improve patient outcomes with products that allow them to get to the prescribed respiratory therapy as quickly as possible and maintain it consistently. AquaVENT® and NeoFlow® will help them achieve this.

Over almost 40 years Armstrong Medical has developed expertise in manufacturing products to reduce the work of breathing for patients. Our easy-to-use and highly effective products meet all the required regulatory standards.

HELPING YOU MEET YOUR ENVIRONMENTAL TARGETS

Reduce

Breathing circuits are approved for single patient use for between 7 and 14 days and are designed to transition easily between respiratory therapies, without the need for a new circuit, helping to reduce both plastic and clinical waste.

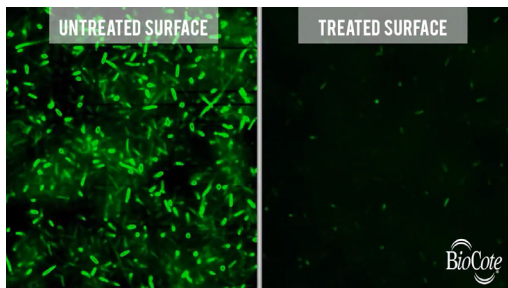

Sustainability

100% of the waste generated at our manufacturing facility is recycled either into other products or to create energy. Solar panels on our buildings produce approximately 21% of our total energy requirement.

Corporate Social Responsibility

You will be buying products manufactured in the UK from a company with over 600 UK based employees, helping to support the domestic economy.

AquaVENT® and NeoFlow® are the only ranges of breathing circuits to come with antimicrobial protection as standard, helping to prevent the colonisation of bacteria on the circuit.

Choose the
right partner

PARTNER WITH US

When partnering with Armstrong Medical you will gain significant opportunities for cost mitigation by maintaining the choice and security provided by open platform systems and the opportunity for improved efficiency from buying all your respiratory requirements from one trusted supplier. By investing in our highest-quality products, you will assist your clinical colleagues in achieving better patient outcomes.
